Email: iamzeyuanhu@utexas.edu

EDUCATION

University of Texas **Austin, TX** **Sept 2017 – May 2019**

- M.S. in Computer Science. (GPA: 4.00/4.00)
- Coursework: Distributed Systems, Operating System, Human Computation, Structured Models in NLP, Machine Learning, Natural Language Processing, Semantics

University of Wisconsin **Madison, WI** **Sept 2010 – Dec 2014**

- B.A. in Computer Science. (GPA: 3.74/4.00)
- B.A. in Economics with Honors. (GPA: 3.85/4.00)
- B.A. in Mathematics. (GPA: 3.81/4.00)
- Recipient of 2013 Honors Summer Sophomore Research Apprenticeship
- Recipient of 2012 Meek Bishop Scholarship in Economics, *top 2 out of 500 economics major students*

WORK EXPERIENCE

Software Engineer **IBM** **August 2015 – August 2017**
DB2 LUW federation team

- Constructed `Hive` and `Impala` wrappers with `C++ and Java` to support federation database between traditional RDBMS and Hadoop-based data warehouse solution
- Created automated setup tools with `Shell` that reduce product configuration time by 75%
- Enhanced server option optimization tools using `C` to reduce federation database performance tuning time by 90 % and enable the capability of tuning the product against Hive, Impala, and Spark
- Resolved over 20 defects, including a severe memory leak issue that impacted a $1.6 million deal. *Awarded IBM Manager's Choice Award 2016*

Research Assistant **UW-Madison** **September 2012 – May 2013**

- Implemented SVM using `Python` to examine the impact of Feedback on children's learning outcomes
- Examined the statistical correlation between fMRI data and DTI data in measuring the brain activity of children during their learning process with `Python`

SELECTED PROJECTS

- **Distributed Key-Value Store** (2018), built a distributed Key-Value Strore with `Python` that uses eventually consistency model with two session guarantees: *Read Your Writes* and *Monotonic Reads*
- **Identifier Inference through Neural Network** (2017), constructed N-gram and Neural language models using `tensorflow` to study the *Identifier naming convention* problem
- **Exploring Stereotypes and Biased Data with the Crowd** (2017), examined the behavior of crowd on Amazon Mechanical Turk to help with the bias detection in datasets for machine learning tasks
- **Sequential CRF for NER** (2017), implemented a system that uses HMM model for POS tagging and CRF model for NER in `Python`

LANGUAGES AND TECHNOLOGIES

- **Languages:** C++; C; Java; Shell; Python; SQL; MATLAB
- **Software:** Db2; Tensorflow; Keras; Git; ClearCase; Hive; Impala; Maven; Hadoop
